Final Project: Worth 1200 Points: <mark>Due Thursday December 5th, 2013 by 11:59 PM.</mark>

Dreamscape Portion Worth 500 Points

For your Final Project I would like you to create a 11 X 17 image of a Dreamscape. It can be based in reality or be complete fantasy. Let your imagination run wild! <mark>Also please give your Dreamscape a name and include it somewhere on your final piece.</mark>

We have covered many principles this term, so I would like you to include or use at least 5 of the bulleted elements in your final image.

- Adding layer effects
- Puppet Warp
- Use of paths
- Typography on a path
- Masks or clipping masks
- Adding adjustment layers
- Perspective
- Smart Filters
- Blending Modes
- Digital Painting tools (Mixing brush)

Make sure all layers are named appropriately. When done, do not flatten the image! I want to be able to see all your layers and elements. Work hard to create a creative and beautiful work of Art and strive for quality

Sketches for Final Project: Worth 300 Points: <mark>Due November 17th, 2013 by 11:59 PM</mark>

For your own preparation, I would advise designing at least two quick sketches and a final sketch to work from before *beginning* your final project. I would like all three of these sketches to be digitized and turned in to BB assignments.

Notes on what was done to your Dreamscape- Worth 100 Points- <mark>Due Thursday December 5th, 2013 by 11:59 PM.</mark>

Please include information using a Note within Photoshop on what was done to your final Dreamscape image. Make sure to state how at least 5 required elements were used in your final Dreamscape image.

Colorize a Black and White Photo- Worth 300 Points- <mark>Due Thursday December 5th, 2013 by 11:59 PM.</mark>

For this portion of the final project I would like you to create a realistic color interpretation of one of the black and white images I have provided to you. Use skills you have learned this term to help you in figuring out what method would work best to colorize one single photo. I found these images on Worth1000.com which is a Photoshop contest site.

Work to create an image that could be mistaken for a real photo if someone didn't know you had colorized it. Make it as believable as possible. Use ONLY the original black and white source image.

The tutorials below use the pen tool, which would be the best method for colorizing your chosen black and white image.

A tutorial that might help you on how to colorize a black and white photo:
